Skills

Object-Oriented Programming (OOP) | Core C# | .NET framework

Core Java | Basics of JFrame GUI development | Basics of Java Servlet and JSP development

HTML | CSS | PHP | Bootstrap | Basic JavaScript | C | MySQL | Databases

Problem-Solving | Analytical Thinking | Teamwork | Communication | Fluent in English

Basic understanding in Agile Development

Education

BSc (Hons) Computer Science, NSBM Green University (Expected Graduation Year: 2025)

Relevant course works:

Developed a website as a project for the Web Application Development module, which allows tourists to find leisure activities in Sri Lanka.

My responsibilities

- Implemented UI/UX design for an intuitive and user-friendly interface.
- Created backend functionalities, including user registration and login.
- Established a MySQL database connection to store user data securely.

Developed a desktop application as a project for the OOP with C# module, for the University library management system using C# and .NET framework.

My responsibilities

- Implemented an efficient database schema using SQL Server to store and manage library information, including books, students, librarians, events, and virtual groups.
- Designed more than 35 user interfaces (UI) and user experience (UX) using C# WinForms.
- Retrieved and displayed data for students, librarians, admins, and other relevant entities.
